MESSAGE FROM THE DIVISION DIRECTOR

Gary Lewis, Director, U of T Division of Endocrinology and Metabolism

What I have learned about mentoring endocrinology trainees: Possibly the most important role of Division Director

During my interview by the search committee in 2008 for the position of Division Director, one of the committee members asked me about my approach to mentoring and whether I thought that mentoring would be an important role I would play. I must admit that I had not given the issue sufficient thought and I gave a poorly considered response. Little did I know that mentoring trainees, junior-, mid-career and senior faculty would possibly be my most important and privileged role over the next 9 years, and one that I would immensely value. I'll limit my comments here to trainee mentoring.

The vast majority of the highly talented applicants to the U of T endocrinology subspecialty residency training program, when asked what type of job description they would most value after completing their endocrinology training, respond that they would like to see patients, teach and do research. After all they are products of an academic medical training environment and have been influenced by positive role models who are engaged in all of these activities. It is evident that mentoring is critically important in helping them to understand the choices that need to be made to achieve their career goals. Furthermore, many endocrinology trainees enter our program with a high level of anxiety about their future, despite their remarkable achievements up to that point. My first task is to try to reduce the level of anxiety and instill a sense of wonderment and joy at the possibilities that lie ahead. I try to help them frame their career decisions in the context of already having achieved job and financial security, a high level of work autonomy, career satisfaction and a very low risk of catastrophic failure as they move forward. There is no single predetermined path that lies ahead and even a decision that does not lead to a satisfactory career path is by no means time wasted – on the contrary it enriches the individual personally and professionally.

I listen attentively and try hard not to lead (very hard for me!) – I am trying in each case first and foremost to discern the individual's core interests and values. We usually start off our conversation with an open ended question regarding their core interests. In the minority of cases they know exactly what they want and how to achieve their career goals. Usually I try to determine whether the trainee's core interest is in 'seeing patients', or 'living and breathing teaching' or 'asking and answering scientific questions, creating new knowledge'. If 'seeing patients' is the trainee's primary interest, not accompanied by either of the other two core interests (i.e. teaching or research), the discussion usually leads to training paths for community endocrinology practice. 'Living and breathing teaching' leads to further discussions about an academic clinician teacher job description and further mentoring by some of our great clinician teachers. I might add here that one type of clinician educator, the individual involved in course development and educational leadership, would best be advised to train as a clinician teacher and subsequently assume increasingly responsible educational leadership roles. The 'creating new knowledge' answer leads to an in depth discussion about clinician scientist career paths. The clinician scientist career path is very broad and includes wet bench discovery research, population health research (clin epi), integrative physiology in humans and animal models, clinical trials research, bioethics, global health, health policy, quality improvement-innovative health systems or education research. From the outset I make it very clear that the key to success as a clinician scientist requires a serious commitment to 'PhD-level' training (PhD not absolutely required but preferable). One career path, Physician in Quality and Innovation, can involve a lesser intensity of training (certificate or

Masters). This academic stream does not prepare an individual for a clinician scientist job description. Individuals with this level of preparation will typically be able to protect up to 30% of their time for academic activities related to QI. I discourage trainees from targeting a Clinician Investigator job description. Although many current members of the Department of Medicine successfully hold the job description of Clinician Investigator, this is not something to aim for in one's training. Rather it may be a blended clinical/research job description that a particularly creative individual may migrate into from either a clinician teacher or scientist position. We are very reluctant to recruit individuals as clinician investigators because at the time of first appointment we cannot provide them with adequate time protection to ensure a successful and productive research career, nor do they have the preparative training that provides us with a high level of confidence that they will be successful in the current highly competitive funding environment.

The issue of job availability at the end of their serious commitment to training is discussed at the outset. Many of our trainees have family connections in Toronto and the vast majority of our trainees would like to remain in Toronto. From the outset I make it very clear that we cannot promise or guarantee a faculty position at U of T – it is impossible for us to do that. Furthermore we would like to observe their development during training and all positions are by search and interview process. I do however assure the trainee that if they acquire a high level of expertise, and if they excel at it, they have an excellent chance of finding a faculty position either at U of T or at any one of the outstanding institutions either in Canada or abroad. As a male Division Director, I am highly cognicent of the fact that approximately three out of four of our trainees are currently women, and are weighing up important life decisions when considering whether to undertake 4 to 5 years of additional research training. Recognising that this is an area in which I am naturally deficient in the mentoring department, I draw heavily on my many highly successful female academic colleagues to openly discuss issues that are front and foremost in this important life decision process.

Mentoring is an ongoing commitment to an individual's career development. We meet regularly throughout their endocrinology training as they work through their decisions, we guide those interested in research in selecting a supervisor and we keep in touch periodically throughout their academic training. I have had the pleasure of working with some of the most talented and committed endocrinologists over the past decade. Unexpectedly, mentoring has been one of the most rewarding aspects of my job as Division Director. I feel privileged to have played a role in the career development of future stars and leaders in Endocrinology.

HONORS AND AWARDS ANNOUNCED IN THE PAST 6 MONTHS (SINCE SPRING 2016 NEWSLETTER)

Special recognition:

Dr. Larry Leiter was the 2016 Recipient of the Canadian Diabetes Association Lifetime Achievement award. The award was presented to Dr. Leiter at the CDA/CSEM Professional Conference and Annual meeting in Ottawa in October 2016.

Larry Leiter was the recipient of the Canadian Society of Endocrinology and Metabolism (CSEM) 2016 Dr. Robert Volpé Distinguished Service Award. The Robert Volpé Distinguished Service Award is awarded to a senior member of the CSEM who has made a significant contribution to the CSEM and the discipline of endocrinology in two or more of the areas of research, education or clinical service

Dr. Catherine Yu – awarded the 2016 U of T Division of Endocrinology George L.A. From Postgraduate Teaching Award

Dr. Robert Silver – recipient of the U of T Division of Endocrinology Dr. Robert Volpé Undergraduate Teaching Award for 2016

DIVISION MEMBER PROFILE- Dr. Karen Gomez-Hernandez, University Health Network

Karen Gomez Hernandez completed her medical degree and Endocrinology residency at the University of Costa Rica in her native city of San Jose, Costa Rica. During the last year of her Endocrine residency, she spent several weeks at University of Texas MD Anderson Cancer Center in the Division of Endocrine Neoplasia and Hormonal Disorders. This is where she was inspired to pursue a career in Endocrine Oncology. After completing her residency in Costa Rica, she moved to Toronto, where from July 2011 to June 2016 she completed fellowships in Thyroidology and Endocrine Oncology. During her last two years of her Endocrine Oncology fellowship and the summer of 2016, she completed a Master's in Science with a focus on the molecular signatures of papillary thyroid carcinoma at the Institute of Medical Science, University of Toronto. In addition, she will complete the University's Master Teacher Program in 2017.

Upon completion of her Masters, Karen joined our division as an Assistant Professor, Clinician Teacher. Her academic interests include undergraduate and postgraduate education as well as clinical research in endocrine neoplasia. She hopes to collaborate with the Endocrine Site Group at UHN and other physicians involved in the diagnosis and treatment of endocrine tumors.

Karen is enthusiastic about teaching and this past summer had the opportunity to give the endocrinology house staff a summer course on common and uncommon endocrine tumors entitled "The Zebra Case Files". In the future, she hopes to develop an Endocrine Oncology training program within the Division of Endocrinology and to involve endocrinology trainees in pituitary and neuroendocrine tumor rounds at UHN.

Whenever she is able to, Karen goes back to Costa Rica to visit her family. In her spare time she enjoys spending time with her friends hiking or cooking a good meal. She is also an avid amateur of cinema and opera, where she is a season ticket holder. Karen is very connected with her church community; here is a picture of Karen hiking in Mount Nemo, taken during one of the trips with her friends from church.
